ABOUT

AI & ML enthusiast with proven experience through projects and internships, skilled in Python and web technologies, and eager to innovate at the intersection of data and intelligence

QUALIFICATIONS

Degree/	University/School	Passing Year
B.Tech- CSE	IILM University, Greater Noida	2023-27
12 th Class	GD Goenka Public School Ghaziabad	2022-23
10 th Class	GD Goenka Public School Ghaziabad	2020-21

INTERNSHIP EXPERIENCE

Deep Learning- Intern	IBM	June 2025 – July 2025
- Designed and implemented a chatbot for telecom complaint handling using Gradio and Ollama. - Integrated deep learning models to understand and resolve customer queries effectively. - Automated customer support workflow, improving query resolution efficiency and user experience		
AI/ML- Intern	IBM	June 2024 – July 2024
- Collaborated on IBM–Vodafone Idea project focused on detecting Wangiri call fraud. - Applied data analysis and machine learning techniques to identify abnormal and fraudulent calling patterns. - Enhanced fraud detection accuracy by leveraging predictive modeling and real-world telecom data.		

ACADEMIC PROJECTS

- Title: Smart Ward Early Warning System (IoT + AI) – Feb 2026**
- Tools/ Technologies used:** ESP8266, Max30102(Oximeter) DS18B20(Body Temp sensor) ,HTML, JavaScript, Backend (Node.js),MongoDB, Postman, Things Speak API ,Twilio
- Description:** Developed a real-time IoT-based Early Warning System that monitors patient vitals (SpO₂, heart rate, temperature), performs risk analysis, and triggers automated WhatsApp alerts to enable faster clinical response.
- Title: Real-Time Web Platform for Emergency Services Integration- Jan 2025**
- Tools/ Technologies used:** HTML, CSS, JavaScript, Backend Framework (Node.js/Flask)
- Description:** Developed a real-time web platform to integrate medical, fire brigade, and police services. The system enables faster emergency response by connecting multiple services on a unified platform
- Title: Hand Gesture /Bluetooth/Voice Enabled Car- Nov 2024**
- Tools/ Technologies used:** Arduino Nano ,Arduino Uno, Bluetooth module , Ultrasonic Sensor, Accelerometer, Sensors
- Description:** Built a multi-mode smart robotic car controlled via hand gestures, Bluetooth, and voice commands using accelerometer sensors and wireless communication.

CERTIFICATIONS

- Python for Everybody – Coursera, April 2025
- Cyber Job Simulation -Deloitte, June 2025
- AWS Cloud Web Application Builder – AWS Training & Certification, Feb 2025
- AI, ML, Python, C, Java, SQL – Infosys Springboard , Jan 2024- Aug 2025

SEMINARS / WORKSHOPS / CONFERENCES

- Attended in Workshop on 3D Printing at IILM University, Apr 2025
- Participated TEDx at IILM university, Feb 2025

TECHNICAL SKILLS

- Programming Languages:** C, Java, Python
- Database Management:** MySQL, Postman, Oracle, MongoDB,
- Software Tools & Platforms:** GitHub, VS Code, Eclipse, Arduino
- Data & Analytics:** Data Structures and Algorithms, Machine Learning (Scikit-learn, TensorFlow, PyTorch)

ACHIEVEMENTS AND EXTRA CURRICULAR ACTIVITIES

- IBMXAWS Hackathon Participant – IILM University, 2026
- Won 1st position at Technical Writing at IBM Ice Day, Jan 2025
- Hackathon Participant – Sharda University, 2025
- GDG Hackathon Participant – IILM University, 2025
- Robo Race Participant – IILM University, 2024

POSITION OF RESPONSIBILITY

- Acted as Coordinator in Treasure Hunt competition in IILM University Sep 2025
- Member of Tech Spark club at IILM University from Aug 2025 to Present
- Chair of IEEE Student Branch at IILM University from Jan 2025 to Present
